

AGWA ArcGis 9.3

Posted by lopesrony - 2010/06/01 07:40

Dear friends of the forum

I have problems in installation of the AGWA ArcGIS 2.0 on 9.3. It features an error "Package".
How to proceed in your installed ArcGIS 9.3?

Do you have ArcGIS 9.3.1 or just 9.3? The latest version on the website was compiled against the 9.3.1 libraries, which will prevent you from installing it on 9.3. If you don't have access to ArcGIS 9.3.1, you can try using the installer for ArcGIS 9.2.

Let me know if that solves your problem.

Shea
